Summary: Developer relations engineer with 12 years of experience building platforms, tools, APIs, and agent systems at Meta and Google, from 0-to-1 prototypes to products used by millions of developers.

EXPERIENCE

Staff Developer Advocate | React Core Team | Meta

Oct 2022 - Present | Menlo Park, California

AI & AGENTS

- Built user-prompted AI generation of spatial 3D environments for VR and smart glasses by integrating Meta's next-generation UI framework with Meta's consumer-facing autonomous agentic AI. Grew the 0-to-1 prototype into an executive-backed, 7-person effort across two organizations.
- Prototyped a developer platform based on A2UI (Google's OSS agentic UI protocol) for third-party agent-generated UI in Meta AI and secured investment to productionize it and build a console and tooling.
- Owned the LLM developer experience for React engineers at Meta, shipping and evaluating skills, plugins, hooks, rules, and tools for Claude, Codex, and Muse Code.

REACT PLATFORM & ECOSYSTEM

- Led React Conf 2024 & 2025, and leveraged it as the launch vehicle for React 19, the React Foundation, and React Compiler. 700+ attendees, 500k+ YouTube views, and top 5% NPS (66).
- Led react.dev's documentation strategy (44M views from 14M users) and wrote the official React tutorial.
- Drove the adoption of React Server Components, leveraging 15+ months of OSS community work to ship support in Vite (1B downloads/yr), React Router v7 (641M downloads/yr), and others. Led the incident response & coordinated vulnerability disclosure for server component vulnerabilities.

The React Foundation | Co-Founder & Board Member

Oct 2024 - Present

- Co-founded the React Foundation, established React's first independent cross-company technical governance, and raised $7.45M from Amazon, Huawei, Meta, Microsoft, Vercel, and others.

Senior Developer Relations Engineer | Google

Jan 2016 - Sep 2022 | Mountain View, California

- Led the design and development of Actions Builder, Google Assistant's platform used to create 50k+ apps, directing a cross-functional team across engineering, product, marketing, and UX from conception to launch.
- Served as Tech Lead for Cloud AI Industry Solutions across 14 products (Dialogflow, Vision, Speech) and 40 GitHub repos. Designed and built Dialogflow's first webhook fulfillment library (1.2M npm downloads) used by >90% of Dialogflow's 500k developers.
- Designed Fuchsia's first public SDK with automated deployments via CI/CD. Built an OS image tool saving ~300K developer-hours/year.

Developer Relations Manager | Evernote

Jul 2014 - Dec 2015 | Redwood City, California

SKILLS

- **AI:** agentic UI creation, A2UI, agent tools (MCP, CLIs, APIs), skills, plugins, hooks, rules, Claude, Codex.
- **Engineering:** JavaScript/TypeScript, React, Node.js, Next.js, Python, Go, Google Cloud Platform (GCP), CI/CD, CLIs, SDKs, SEV management & incident response.
- **Developer Relations:** platform and technical strategy, API & SDK design, prototyping, proofs of concept, tutorials, onboarding, developer outreach, public speaking (Google I/O, Google Cloud Next, SXSW, etc.), video creation, blogging, internal comms, influencer relationship management.

EDUCATION

Bachelor of Science in Chemical Engineering | University of California, Santa Barbara
